

Sam Dugdale

Front End Developer - <https://samdugdale.github.io/>

👤 Profile

I'm a Front-End Developer with a BSc in Computing and have recently taken part in a Bootcamp course to refresh my skills. I have good working knowledge in HTML, CSS, JavaScript and am currently studying modern libraries and frameworks while developing personal projects. I have a genuine passion for usability, learning and technology as a whole. I enjoy finding solutions, learning new things and have a talent for being able to streamline processes.

📁 Employment History

Online Sales Listings Creator, British Heart Foundation - eBay

October 2017 – March 2021

BHF boasts the second largest eBay charity shop worldwide with over £20m raised to date. I specialized in electricals initially and eventually moved onto vintage books. As a constantly growing operation with office space doubling in my time there my role involved such things as:

- Making suggestions and implementing them to improve our operations. One of my biggest contributions was changing how electrical items were processed and allowing listers to double the previous target from 20 to 40 per day.
- Processing items carefully, researching and then listing them on our eBay page Online presence.
- Assisting in CSS styling of listing templates for the BHF eBay page.
- Team work was majorly essential, working closely together and helping each other out was what drove our fantastic sales.
- Testing electronic or data bearing items, ensuring they are safe as well as data compliant with CPNI standards.
- Ensuring proper documentation and reports were completed when necessary.

Sales Advisor - TV Specialist & Team Leader, Dixons Carphone (Currys)

September 2013 – October 2016 (plus 2010 - 2011)

My role at Currys was strongly target based and involved me being versatile. As a core team member of one of the highest grossing stores my activities included:

- Ensuring that my KPI's were always met and exceeded as well my departments.
- Specializing in TV's and other product areas by attending courses and keeping up to date with the latest technologies.
- Team work was majorly essential, working closely together and helping each other out was what drove our fantastic sales.
- Maintaining my departments and others areas of the stores standards to ensure our customers always had the best impression.
- Processing business sales which involved processing large business plans and credit applications.
- Training other members of staff as well as ensuring myself and they were always up to date with our training.
